

Feedback for RRMP Research Proposal Presentation [Formative]

Tutor completing formative feedback: Karen Outram	Student number: Nithya Kanakavelu
Details of any extensions etc:	Submission Attempt: Formative

Thank you for submitting your formative.

Your proposed is current, relevant and also reflects propositions for medical treatment that would help people. It is a good subject to tackle initially here through this module and then moving forward for a Capstone project. The content of your formative reflects a wider context of a broader study looking at the aims. For the actual summative in this module, keep the initial discussion focused and then if you move this subject forward to Capstone you can broaden your discussion out then. Good to see such a comprehensive list of potential research resources on your list – this approach will save you time when you come to actually complete the summative itself.

General advice to all students:

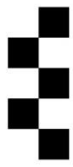

Remember to cite on your power presentation, in your transcript and also orally cite in your oral presentation for this summative. Ensure that you have a long list of references in alphabetical order on your power at the end of the presentation and at the end of your transcript. Please refer to seminar 5 if you are unsure about any of these details.

***The comment is added to every student formative feedback sheet:** Please ensure that when you complete your summative submission for the Research Proposal Presentation, that the research, content and context is **COMPLETELY DIFFERENT** to your Literature Review. This is for several reasons; you need to avoid self-plagiarism, [if content is close to or similar to the Literature Review TURNITIN will detect this], a summative can only be graded once and so if your LT and RPP are too similar theoretically it is the same piece of work and summative academic work has to 'build' upon research so that every summative submission is different from the previous summative submission. *This is a standard academic rule in all academic writing/summative submission.* And so, you can 'build' upon your subject from the Literature Review to the Research Proposal Presentation, but it **MUST** different from the Literature Review.

The burden of ensuring each summative is 'new' rests with the student, and so please do observe the above when completing all summative submissions, thank you.

All research has to be from secondary research resources – do not engage with primary research

***Please also ensure that you engage with critical analysis in your content, and you debate a 'pros' and 'cons' perspective for your research, in your RPP summative.**

Wishing you the best of luck now for your actual summative submission,

With best wishes

Karen
